

CONTENTS

Editor's Note <i>Sungwoo Shin, Hanseung Lee and Gi Dong Bae</i>	199
General Article	
Evaluation of the traditional calibration methods in ICP-MS analysis of toxic elements in water <i>Trevor Chiweshe and Sumit Kumar</i>	201
Agentic AI for sustainable development: Trust protocol for carbon emissions decomposition and retrospective analysis <i>Timur Dosmambetov and Yonghan Ahn</i>	214
Analysis of score attainment in the materials and resources category of Korea's green building certification (G-SEED): A Study on non-residential buildings <i>Taehyoung Kim, Kyungjoo Cho, Yosun Yoon, Sungmo Seo, Daehee Jang and Seungjun Roh</i>	253
Intelligent video monitoring system for risk assessment and behavioral analysis in sustainable building environments <i>Mohammed Arif Hasan Chowdhury, Jeenat Sultana, Shusmoy Chowdhury, Mashetti Santhoshi, Rajender Kumar and Gaurav Sharma</i>	270
An explainable hybrid CNN LSTM framework with grasshopper optimization for sustainable pedestrian behavior modeling and analysis <i>Tanya Gupta and Neera Batra</i>	286
Revealing the impacts of external environment on greenwashing behavior: A study in the Vietnamese construction industry <i>Minh Van Nguyen, Thuc Dinh Le and Khoa Van Nguyen</i>	305
A Proposed procurement document structuring framework for modular housing based on a comparative analysis of national requirement structures <i>Jinhak Jeong and Yonghan Ahn</i>	331
Towards durable and sustainable building power generation: Tuning oxygen vacancies and carrier mobility in $\text{La}_{2-x}\text{Ba}_x\text{NiO}_{4\pm\delta}$ nickelates for high-efficiency solid oxide fuel cells <i>Zabihullah Jaweed, Pallavi Sharma, Halan Ganesan, Sukhpreet Singh, Deepak Sharma, Surya Kant Singh, Ramesh Chand, Ravinder Pal Singh, Ankit Oza and Manoj Kumar</i>	353

CONTENTS

Developing a data-driven competency framework and maturity model structure for modular construction designers <i>Woojae Kim and Yonghan Ahn</i>	366
IoT sensor-based AI framework for sustainable building performance optimization using random forest prediction modeling <i>Parneet Kaur, Deepali Gupta and Mudita Uppal</i>	388
AI-driven THz MIMO antenna optimization device for intelligent building monitoring and sustainable urban infrastructure <i>Rahul Gupta, Hemlata Sinha and Anil Kumar Soni</i>	415
